Jitesh Joshi

jitesh.joshi.20@ucl.ac.uk jnj256 jnj256 jnj256.github.io

Professional Summary

Highly motivated researcher with a decade of experience in **AI, computer vision**, and **deep learning**, specializing in developing innovative solutions for real-world applications, particularly in **wearable computing** and **healthcare**. Proven track record in publishing at top-tier AI venues, such as **NeurIPS** and **BMVC**, and developing novel techniques in areas such as **multi-dimensional attention mechanisms, contrastive learning frameworks**, and **physiological computing**. Expertise in developing **efficient** and **deployable AI systems**, demonstrating deep understanding of **systems engineering**, resource constrained applications, and **signal processing**. Eager to leverage strong research and engineering foundations to contribute to impactful healthcare technology.

Education

- **Ph.D. Candidate | University College London, UK (2020–2025)**
  Research Area: Robust cross-dataset generalization using multi-dimensional attention mechanism for camera-based sensing of bio-signals.
  • Advisors: Prof. Youngjun Cho ( ), Prof. Nadia Berthouze ( )
  • Supported by a fully funded departmental studentship for overseas PhD candidates.
- **M.Sc., Cognitive Systems & Interactive Media | Pompeu Fabra University, Spain (2010–2011)**
  Research Area: EEG-based Investigation of Brain Wave Entrainment by Binaural Beats & Music.
  • Advisors: Dr. Sylvain Le Groux ( ), Prof. Paul Verschure ( )
- **B.Tech., Electronics & Communication | Nirma University, India (2004–2008)**
  • Major: Signal Processing, Digital System Design, Modern Processor Architecture

Work Experience [Employment History]

2024 – · · · ·
Research Associate | University College London, United Kingdom
Part-time role alongside doctoral studies
• *Research areas*: Photorealistic image synthesis using generative AI tools including diffusion models and neural-style transfer, multi-modal semantic segmentation.

2020 – 2024
Post Graduate Teaching Assistant | University College London, United Kingdom
Part-time role alongside doctoral studies
• Supported under-grad and post-grad teaching modules on research methods, physiological computing, and systems engineering.
• Mentored under-grad and post-grad students from diverse academic and industry backgrounds for their module and dissertation projects in machine learning, physiological computing and human-computer interaction system design.

2016 – 2024
Solution Architect | Tata Elxsi, Pune-India ('16–'20) and London-UK ('20–'24)
• Led the design and implementation of AI-driven medical imaging solutions, resulting in successful deployment and validation of complex real-world systems.
• Managed high-impact client projects exceeding $1 million in revenue and contributing to successful and on-time project delivery.
• Contributed to patents on resource-constrained edge-AI based solutions for on-device dense object detection and optical system designs to ensure consistent, high quality real-world image acquisition.

Work Experience [Employment History] (continued)

2014 – 2016 **Sr. Scientist - R&D | Azoi Inc, Ahmedabad, India**
• Developed algorithms for real-time, handheld vital signs monitoring devices, incorporating clinical validation and EU regulatory compliance

2011 – 2014 **Senior R&D Engineer | National Brain Research Centre, Manesar, India**
• *Research areas*: fMRI-based investigation of functional alterations in visuospatial perception as a potential biomarker for Alzheimer's disease; Development of frameworks for synchronized acquisition of fMRI data and the presentation of audiovisual stimuli.

Awards and Achievements

2020 **Project Excellence Awards, Tata Elxsi**
• Design and development of an AI-based Edge imaging device for automated counting of bacterial colonies, targeted for the global food and beverage industry.
Role: System Architect and Project Manager
• Design of an innovative automated peritoneal dialysis system.
Role: R&D Lead

2019 **Hackathon Winner, Tata Elxsi**
AI-based medical image enhancement

2018 Prestigious **Tata Innovista** Award
Point-of-care diagnostic device for malaria and sickle cell disease URL

Technical Skills

Research Areas	Computer-vision, deep learning, generative models, contrastive learning, multi-modal sensing, physiological computing, signal processing, on-device AI algorithms, neuro-imaging, cognitive science, human-computer interaction.
Professional Competencies	Project management, system engineering, medical device development, on-device implementation, optical system design, system validation, and regulatory compliance.
Programming Languages	Python, C/C++, MATLAB, Arduino, LaTeX
Frameworks	PyTorch, TensorFlow

Certifications

2024 **Generative AI with Large Language Models**. In Progress with Coursera

2019 **Executive Data Science Specialization**. Awarded by Coursera.

2018 **Deep Learning Specialization**. Awarded by Coursera.
